

Firmex Introduces Two-Step Verification

A step-by-step guide to Two-Step Verification

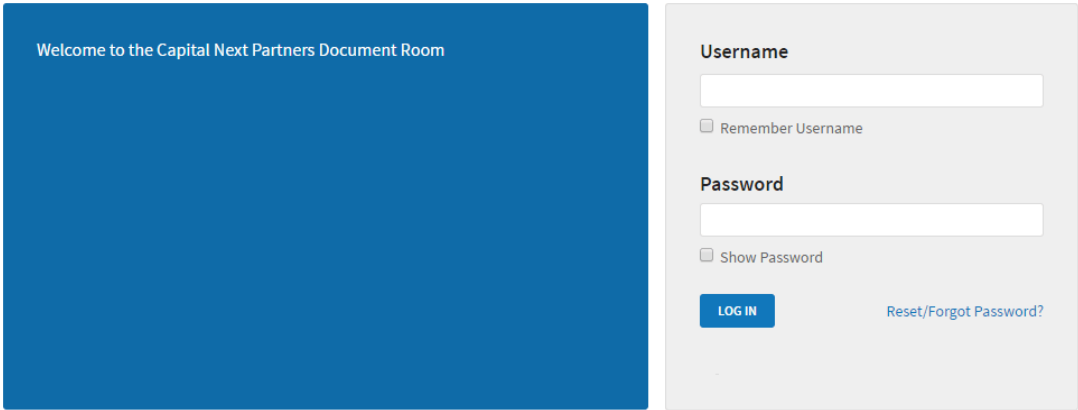

Firmex is pleased to introduce two-step verification for this data room. The new tool will improve security while ensuring continued access to your important documents.

When you next log in, you will be asked to enter a secondary code, apart from your usual Firmex password. This code will be sent to either your email address or mobile device. Once you enter the code, you can ask Firmex to remember you on the computer in question, to avoid having to resend the code on your next login.

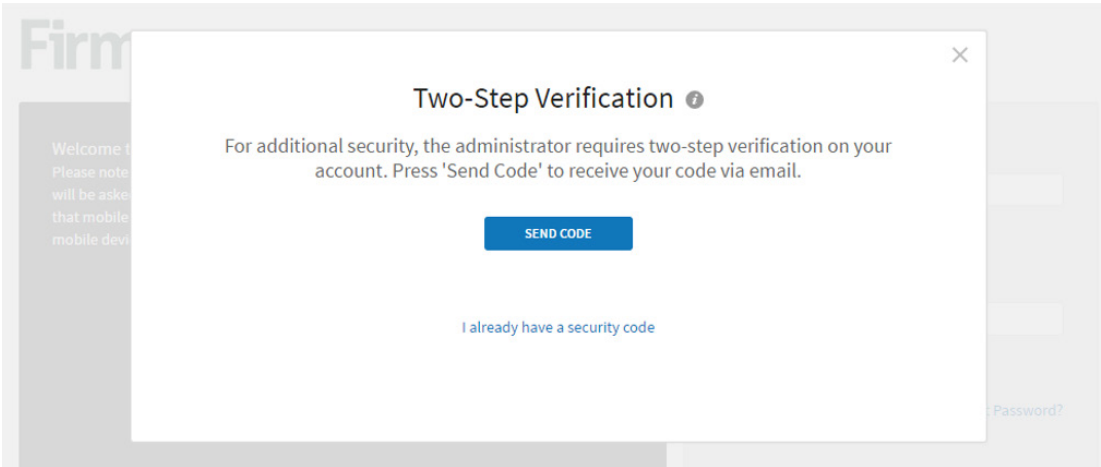

How to Log In Upon the Introduction of Two-Step Verification

1. From the login screen, enter your username and password.

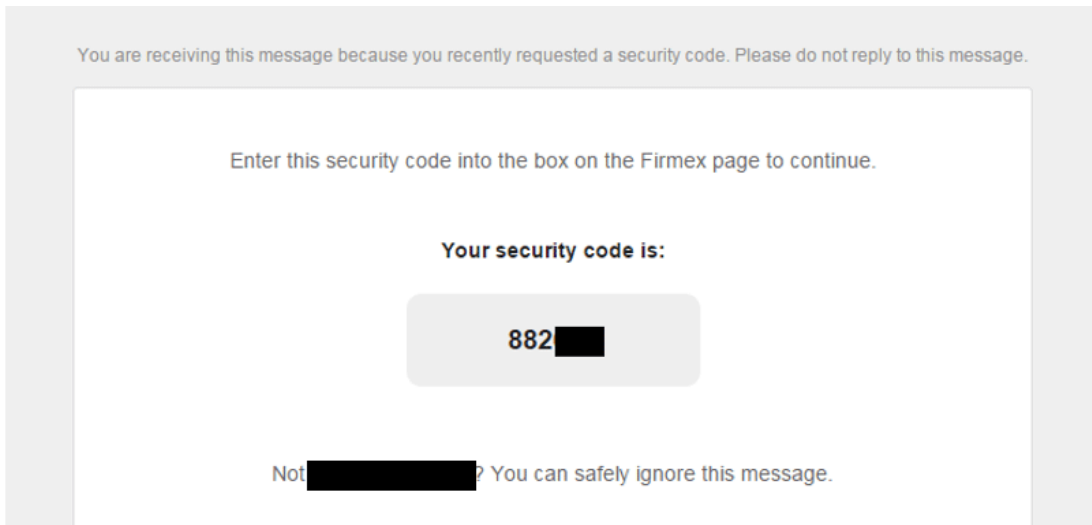

CapitalNext

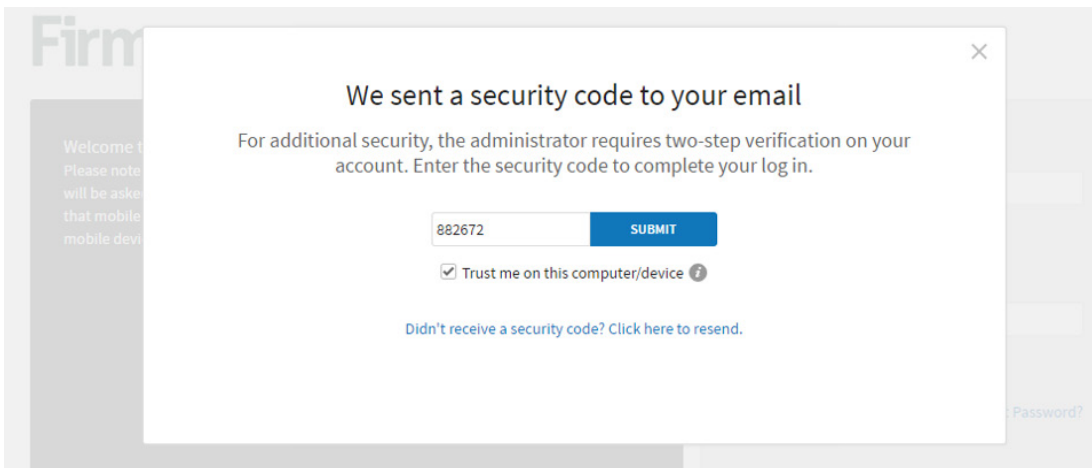

2. You may then either be instructed to enter a mobile number, to which we will send a six-digit code by SMS. Alternatively, we may send the code directly to the email address associated with your account.

- The six digit code will arrive shortly. Below is how it looks in an email. Alternatively, the six digit code could be sent to your mobile device via SMS.

- Enter the code in the space provided and check **Trust me on this computer/device** if you are logging in from a private or trusted device.

If you have any questions about logging in, please reach out to **support@firmex.com**. General inquiries about the data rooms should, as always, go to your project's administrators.
